PETS or WILD ANIMALS?

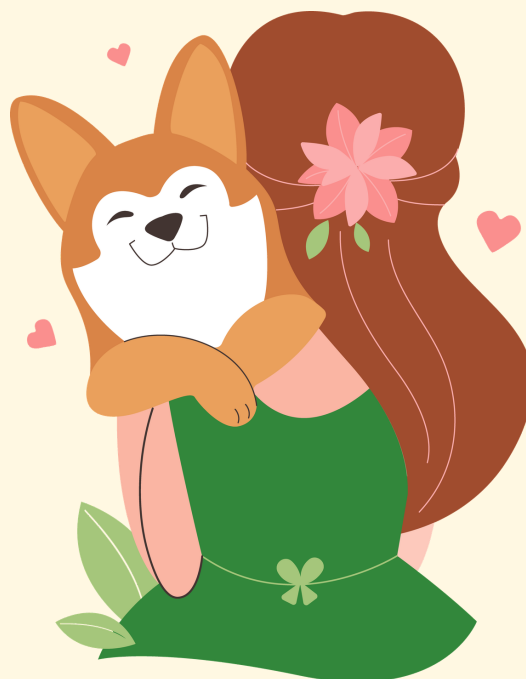

What's the difference?

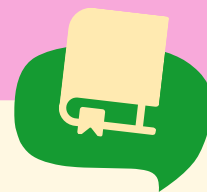

Pets = Part of the Family

Pets are special animals who live with us at home. They love people and feel happy when they are part of our family.

Улюбленці, які живуть з людьми вдома, і є частиною родини.

Only dogs and cats are real pets!
They live in our homes, not in nature.

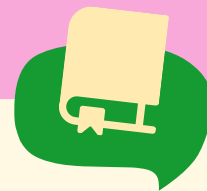

Friends Who Live Near People

Animals who live close to people. They need our help, care, and love. They also need food and safe homes. They are not pets, and they are not wild – but they are our friends!

Тварини, які живуть поруч з людьми. Вони не дикі, адже потребують нашої допомоги.

Examples: Pig, Cow, Chicken

Wild Animals = Neighbours

Wild Animals need lots of space, nature, and freedom. They can't live a happy life in your home or a cage.

Тварини, які живуть у природі. Їм потрібні воля та простір.

Parrots live in the forest. Some people keep them in cages, but they are wild birds. They need trees, friends, and freedom to fly.

Wild animals live in nature. They are our neighbours on this planet. Be kind to your neighbours.

Examples: Elephant, Parrot, Fox, Tiger, Dolphin
